Please don't interfere with XM radio. This is a wonderful service that is greatly appreciated by one of the least appreciated groups of workers in our society. I'm referring to over the road truckers. My husband is a trucker and a good one. He loves his XM radio because he doesn't have to constantly search for stations while he is driving down the road. He can actually listen to a complete program. I realize that it's difficult for those in offices to understand what a blessing this service is to those out working on the roads of our country. Please realize that truckers love this service passionately. They have enough problems with fuel prices and rude drivers and people who don't respect them because of what they do. Don't mess with this service that helps to keep their eyes on the road and their spirits lifted because there are so many programs targeted to truckers. My husband calls me many times a day and sometimes it's just to repeat a joke he just heard on XM. We PAY for this service. Why should you mess with something that we pay for? It's important for the truckers to know the weather where they are and where they are going. They don't want to have to mess with looking for local channels any longer. Weather news is very important to them. They might have to chain up if they are going through the mountains and it's snowing. Heavy winds are dangerous if you have a light load. If you mess with this radio service you are going to create a LOT of ill will. The drivers are still upset about the new rules of service and now the government is considering messing with something else. You can't stop progress although the NAB had tried many times. I realize that they spend a lot of money in Washington DC but can't you just tell them to get a life. Honestly, this service and local information are very important to people that most of you in Washington DC don't even realize are out there working hard every day to keep this country strong.
